Moderator

Dr. Akira Kobayashi

Associate Professor, Kanazawa University

In this webinar, we are excited to host internationally acclaimed surgeons specializing in corneal transplant, who will discuss the latest developments in corneal endothelial keratoplasty. The content aims to engage not only experienced DMEK surgeons but also beginners and those new to DMEK. We eagerly anticipate the attendance of professionals from Japan and around the world.

Presenters

1. Benefits of “endo-in” DMEK insertion technique in both regular and complex eyes

Dr. Marc Muraine

Chief of Rouen University Hospital, ophthalmology department

2. Tips for unfolding in DMEK for viterctomyzed eyes

Dr. Takahiko Hayashi

Nihon University Itabashi Hospital

3. Replacement of decompensated corneal endothelium in high-risk situations

Dr. Björn Bachmann

Uniklinik Köln
